

We are trying to get a picture of the brilliant nature features we have in Ovingham.

Can you help us?

All you need to do is map out the following features that are in your garden by drawing and writing in the space below

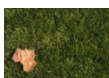

Trees. Say what kind they are or stick a leaf on

Flowers or vegetables. Sources of nectar for bees & butterflies

Hedges. Great places for birds to nest & hide

Lawns. Where insects and worms live.

Ponds. Frogs love 'em

Every square equals 1 metre. When you are mapping your garden use a big step to measure a metre-it doesn't have to be perfect!

This side tells us where your garden and the features are. We're hoping to put everything on one big map which you will be able to see.
